GENTRY'S HALEAKEA GOES 24.5 SEER!

Gentry Homes continues to raise the bar on efficiency and adaptive new home designs, giving their homebuyers more comfort and value than ever before. The New Haleakea Project offers up to 2,300 sq. ft of living space and utilizes **ONLY TWO TONS OF AIR CONDITIONING!** That's right, two tons for over 2,000 sq. ft of living space. And the two tons is the most energy efficient on the planet coming in at a whopping 24.5 SEER. Gentry is installing the Maytag Inverter IQ Drive Air Conditioning System as a **STANDARD FEATURE** in the homes of which half will feature golf course frontage on the 27 hole Hawaii Prince Golf Course. In addition to the Maytag Air Conditioning System, the homes feature a 1KW Photovoltaic Panel, Electric Car Outlet, Solar System, Low E Dual Pane Windows, Open Cell Insulation, Ultra-Violet Light and a Fluorescent Lighting Package that results in an estimated 50% energy saving on monthly electric bills. Admor HVAC is proud and honored to supply Gentry the Maytag Air Conditioning, Ultra-Violet Lights, Merv 8 Filtration and Panasonic Exhaust Fans for this exciting new project that represents the most energy efficient production homes in the State of Hawaii. Call Admor HVAC for more information or visit the Gentry Model Homes. www.gentryhawaii.com

Bob Brant, CEO & Norman Gentry of Gentry Homes attend blessing for New Haleakea Project.

Maytag 24.5 SEER IQ Drive Air Conditioning System provides cooling for Hawaii's most energy efficient production homes.

LAST HAL U OF THE YEAR

Limited spots are available for the last two Halcyon University Classes of the year. Hal U provides techs with an in-depth look at installation techniques and hands-on troubleshooting and servicing of Fujitsu Halcyon mini-split systems.

Coming this November

A new Halcyon University course providing technical training on new Halcyon HFI multi-zone products. This 2-8 zone system has some new and unique features expanding our existing inverter technology to cover a wide range of applications never before possible with a single mini-split system. The course covers application, sizing, pipe layout, equipment location and installation of indoor and outdoor units. Additionally, attendees will get to work with operating equipment in hands on lab sessions while learning how to start, commission and troubleshoot the system using the new digital display readout board which can identify and help locate faults in each unit or the entire system.
