BLUE DUCT UNDERGROUND AIR DUCT SYSTEM

Admor HVAC is now the exclusive distributor for the Blue Duct Underground Air Ducting System for Hawaii and Guam. This revolutionary product provides an energy saving and reliable solution to underground ducting. Blue Duct Systems incorporate the next generation of thermal technologies to create a superior energy efficient product and performance that meets the next generation of air distribution systems. With a NSF Thermal Performance of 10, Blue Duct maintains temperatures and thermal efficiencies equivalent to ductwork (FRP, PVC, or galvanized). The Blue Duct System consistently achieves lower temperatures compared to those of plastic, fiber glass or metal duct systems. Blue Duct is manufactured with a closed cell plastic material that is food grade and safe for humans and the environment. The product is available in residential sizes of 3" to 18" and commercial sizes from 20" to 36". Various fittings for any application are also available. Blue Duct is a complete air and water tight system that can be installed easily wherever you have a need for underground ducting. Blue Duct meets all SMACNA Seal Classes, is Non-Toxic and Corrosive Resistant, Impenetrable to Radon Gas and UL-181 Section 11 compliant for no mold growth. Call Admor HVAC Today for more information.
