COOL CLASSROOMS

Keeping classrooms cool and comfortable is becoming easier thanks to Marvair. Several schools in Hawaii and Guam are now installing the Marvair Scholar III Classroom Air Conditioner. The Scholar III is a self-contained cooling system designed to provide cooling, dehumidification and fresh air for classrooms. The units are installed inside the classroom against an exterior wall. The vertical configuration minimizes the floor space occupied by the air conditioner. The system eliminates duct work, refrigerant lines and the need to place equipment outside or on the roof. This greatly reduces installation time and cost. This unique design makes it ideal for both new schools and for renovation of existing classrooms. Some advantages of the Marvair Scholar III are; Quiet Operation for improved learning (45 dba), High Efficiency, R410A Refrigerant, Humidity Control, Dehumidification, Variable Hot Gas Reheat, Ease of Installation and service. Hawaii schools that have specified and/or installed the Scholar III include Lincoln Elementary, Pohakea Elementary, Kalihi Uka Elementary, Ilima Intermediate and Waianae High School. Upcoming installations include University of Hawaii Snyder Hall and JFK High School in Guam.
