# FUJITSU

Please join Admor HVAC and Fujitsu as we introduce Hawaii to the New Hybrid Flex Inverter Air Conditioning System that gives you the ability to cool up to 8 zones from a single outdoor unit. The "Hybrid" is the blending of a complex VRF/VRV system with the simplicity of a multi-zone system to create a new Hybrid solution that shares the best of both systems.

The Fujitsu Hybrid allows you to mix or match wall, duct type or ceiling cassettes in 156 different btuh combinations making it the right choice for your home or business. The Variable Speed Compressor provides computerized zone control for maximum energy savings. The Hybrid can be easily installed using flare connections and can handle up to 377' total pipe length and 98' of height between the outdoor and indoor units.

## The ecobee Smart Thermostat

The Internet enabled ecobee Smart Thermostat allows you to manage your home or business comfort from anywhere at anytime. Unique features automate energy conservation to help you conserve energy, save money and reduce your environmental impact. The ecobee has a full color touchscreen display and is internet wi-fi enabled. It connects quickly and simply to your wireless router. You can access your ecobee through a personal and secure portal. You can manage all aspects of your Smart Thermostat from anywhere there is an internet connection. You can even set your temperature and on/off schedule with your iPhone. There's an app for that!

Visit the website
