**ALL NEW  
MULTI-ZONES**

Contractors can now select either a, 18, 24 or 36,000 BTU Outdoor Unit and connect to Wall Mounted, Compact Cassette or Slim Duct Type indoor units. Mix and match flexibility of evaporator type and capacity allows you to choose the indoor unit that best fits the application. There are over 300 available combinations of indoor units in Dual, Tri and Quad Zone capacities. We have also introduced new 7,000 BTU Wall Mount and Duct Type evaporators that are perfect for small bedrooms or offices. All of the new Fujitsu Multi-Zones also feature an improved 7 Year Compressor and 5 Year Parts Warranty. Best of all, the new Fujitsu Multi-Zones are priced lower than the competition and have SEER Ratings up to 18! These systems DO NOT require a branch box and install just like our previous models. You can save thousands of dollars versus a more

expensive and complicated VRF/VRV system. Call Today for specs, literature and pricing.
